REFERENCES

This brief updates information given in an NPIC report of August 1965 1/ and presents changes in the plant since [redacted] Item numbers and area letters refer to the referenced NPIC report.

25X1D

Area A. A separately walled storage-type building and a possible warehouse have been constructed just south of the probable nitric acid plant. Item 6 has been expanded and one small building constructed. Southeast of the probable nitroglycerine facility one building has been expanded and one small building constructed.

Area B. Two support buildings, one near item 25 and the other near item 11, have been constructed.

25X1D

Area C. Item 22 in the processing line, under construction in [redacted] is now completed. A storage/service building has been constructed at the end of the processing line; it is near and similar to item 19. One storage/support building has been erected near items 31 and 32 and 2 small support buildings constructed near the second processing line are possibly associated with the line.

Area D. Two small support buildings in the probable ballistics laboratory area and one support building near the packing and temporary storage area have been constructed.

Area E. Three small multistory apartment buildings have been constructed just west of the large multistory apartments in the housing and administration area.

No changes were observed in the storage facility. Two buildings were constructed in the southwest corner of the industrial plant, which is between Plant 18 and the storage facility.
